Prevent breaches, get deep visibility to detect and stop threats fast, and automate your network and security operations to save time and work smarter.

Prevent breaches

Need to prevent breaches automatically to keep your business moving forward? Talos, our team of 250+ threat researchers, analyze millions of threats daily and create security protections that the Cisco NGFW uses to protect you against the next big breach. WannaCry? NotPetya? VPNFilter? Talos stopped these mega-breaches (and others) before they hit, and Cisco firewall customers were automatically protected. Not a bad track record.

See more to detect and stop threats fast

Worried that your firewall isn't showing you the full picture? Cisco NGFWs go beyond prevention and access control to give you deep visibility to see and stop threats fast. Use built-in advanced security features like next-generation IPS, advanced malware protection, and sandboxing to see across users, hosts, networks and infrastructure. They continuously monitor for suspicious activity and automatically stop it the instant it is seen. Our advanced security capabilities help you see more so you can stop more.

Automate to save time and work smart

Are your products working you instead of working **for** you? Cisco NGFW automates your networking and security operations to save you time and reduce complexity so you can focus on high priority tasks. Threat alerts are prioritized so you can stop playing whack-a-mole and focus on what matters most. Cisco NGFWs work together with the rest of Cisco's integrated security tools to give you visibility across multiple attack vectors, from edge to endpoint. When this system of tools sees a threat in one place, it will automatically be blocked everywhere.

Model Overview

Cisco Firepower 2100 Series

The industry's first midrange NGFWs delivering sustainable performance when threat inspection is enabled

Cisco Firepower 4100 Series: The industry's first 1RU NGFWs with 40-Gbps interfaces

Cisco Firepower 9300:
Ultra-high-performance NGFW, expandable as your
needs grow

Cisco ASA 5500-X Series:

Models for branch offices, industrial applications, and the Internet edge

Firepower NGFWv:

The NGFW for virtual and cloud environments

Platform Image Support

The Cisco Firepower NGFW includes Application Visibility and Control (AVC), optional Next-Gen IPS (NGIPS), Cisco[®] Advanced Malware Protection (AMP) for Networks, and URL Filtering. The Cisco Firepower 2100 Series, 4100 Series, and 9300 appliances use the Cisco Firepower Threat Defense software image. Alternatively, Cisco Firepower 2100 Series, 4100 Series, and 9300 appliances can support the Cisco Adaptive Security Appliance (ASA) software image.

Management Options

Cisco Firepower NGFWs may be managed in a variety of ways depending on the way you work, your environment, and your needs.

<u>The Cisco Firepower Management Center</u> (formerly FireSIGHT) provides centralized management of the Cisco Firepower NGFW, the Cisco Firepower NGIPS, and Cisco AMP for Networks. It also provides threat correlation for network sensors and Advanced Malware Protection (AMP) for Endpoints.

The <u>Cisco Firepower Device Manager</u> is available for local management of 2100 Series and select 5500-X Series devices running the Cisco Firepower Threat Defense software image.

The Cisco <u>Adaptive Security Device Manager</u> is available for local management of the Cisco Firepower 2100 Series, 4100 Series, Cisco Firepower 9300 Series, and Cisco ASA 5500-X Series devices running the ASA software image.

<u>Cisco Defense Orchestrator</u> cloud-based management is also available for consistent policy management across Cisco security devices running the ASA software image, enabling greater management efficiency for the distributed enterprise.

Firepower DDoS Mitigation

Also available on the Cisco Firepower 4100 Series and 9300 appliances is tightly integrated, comprehensive, behavioral DDoS mitigation for both network and application infrastructure protection. This DDoS mitigation is Radware's Virtual DefensePro (vDP). It is available from and supported directly by Cisco.

Cisco Firepower 2100 Series Appliances

The Cisco Firepower 2100 Series is a family of four threat-focused NGFW security platforms that deliver business resiliency through superior threat defense. It offers exceptional sustained performance when advanced threat functions are enabled. These platforms uniquely incorporate an innovative dual multicore CPU architecture that optimizes firewall, cryptographic, and threat inspection functions simultaneously. The series' firewall throughput range addresses use cases from the Internet edge to the data center. Network Equipment Building Standards (NEBS)- compliance is supported by the Cisco Firepower 2100 Series platform.

Cisco Firepower 4100 Series Appliances

The Cisco Firepower 4100 Series is a family of four threat-focused NGFW security platforms. Their throughput range addresses data center and internet edge use cases. They deliver superior threat defense, at faster speeds, with a smaller

footprint. Cisco Firepower 4100 Series supports flow-offloading, programmatic orchestration, and the management of security services with RESTful APIs. Network Equipment Building Standards (NEBS)-compliance is supported by the Cisco Firepower 4120 platform.

Cisco Firepower 9300 Security Appliance

The Cisco Firepower 9300 is a scalable (beyond 1 Tbps when clustered), carrier-grade, modular platform designed for service providers, high-performance computing centers, large data centers, campuses, high-frequency trading environments, and other environments that require low (less than 5-microsecond offload) latency and exceptional throughput. Cisco Firepower 9300 supports flow-offloading, programmatic orchestration, and the management of security services with RESTful APIs. It is also available in Network Equipment Building Standards (NEBS)-compliant configurations.

Cisco ASA 5500-FTD-X Series Appliances

The Cisco ASA 5500-FTD-X Series is a family of eight threat-focused NGFW security platforms. Their throughput range addresses use cases from the small or branch office to the Internet edge. They deliver superior threat defense in a cost-effective footprint.

Cisco Firepower NGFW Virtual (NGFWv) Appliances

Cisco Firepower NGFWv is available on VMware, KVM, and the Amazon Web Services (AWS) and Microsoft Azure environments for virtual, public, private, and hybrid cloud environments. Organizations employing SDN can rapidly provision and orchestrate flexible network protection with Firepower NGFWv. As well, organizations using NFV can further lower costs utilizing Firepower NGFWv.

Performance Highlights

Performance Testing Methodologies

Cisco uses a variety of testing methodologies in a lab environment to ensure the performance specifications we report are as close to real world as possible. Firewall performance is affected by many factors including network environment, packet sizes, packet type, TLS encryption, and more.

Two modes of firewall testing exist: static or real world. Static testing leverages performance and security testing tools in a simulated environment. Real-world testing uses samples of live traffic on a production or side-car network. While static testing does not completely mimic performance in a real-world networking environment, we review and modify the static methodology to ensure the results are as close to real-world as possible.

The following are test methodologies used for measurements listed in Table 1. Change in performance vs change in packet size is not linear, so extrapolation from a single test is not possible for the almost unlimited variety of network environments. Testing security efficacy or security service performance under loaded conditions adds even more complexity. For these reasons we rely on the 1024B HTTP Test.

1024B HTTP Test (256KB Object)

This number is to compare with other vendors at a 256KB object size. It uses a larger and commonly tested packet size for every simulated session. With the protocol overhead, the average frame size is around 1024 bytes. This represents typical production conditions for most firewall deployments.

1500B UDP vs 64B UDP

This test uses a transactional UDP profile with either 1500B or 64B frames. Due to the stateless nature of UDP, it creates very little impact on a stateful NGFW. Many vendors use this profile to measure maximum firewall performance, however

it is only practical as a comparison point. This test does not represent real-world conditions, therefore Cisco only uses it as a legacy metric for ASA performance. For NGFW products, various UDP packet size should only be used to test latency and not overall performance.

Specifications

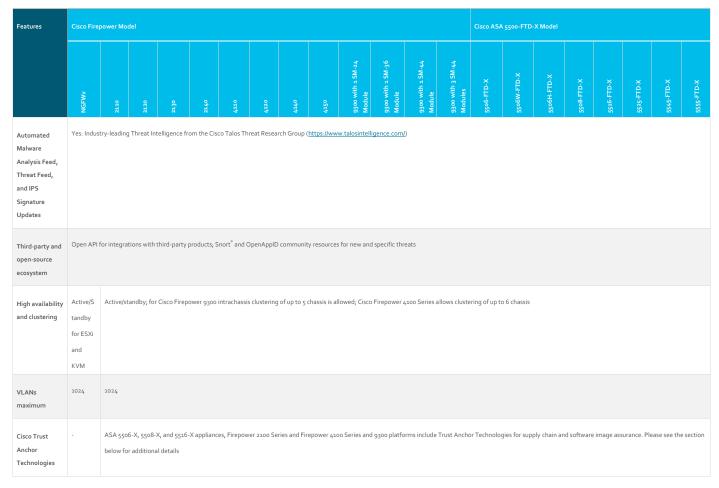

Performance Specifications and Feature Highlights

Table 1 summarizes the capabilities of the Cisco Firepower NGFWv, Firepower 2100 Series, and 4100 Series and 9300 appliances as well as the Cisco ASA 5500-FTD-X appliances when running the Cisco Firepower Threat Defense image. All numbers are derived with two-way traffic evaluation to replicate the best security posture.

Serial port	1 x RJ-45 console								
USB	1 x USB 2.0								
Storage	Up to 2.4 TB per c	hassis (800 GB per so	ecurity module in RAID-1 co	onfiguration)					
Power supplies		AC power supply	-48V DC power supply	HVDC power supply					
	Input voltage	200 to 240V AC	-40V to -60V DC*	240 to 380V DC					
	Maximum input current	15.5A to 12.9A	69A to 42A	<14A at 200V					
	Maximum output power	2500W	2500W	2500W					
	Frequency	50 to 60 Hz	-	-					
	Efficiency (at 50% load)	92%	92%	92% (at 50% load)					
	Redundancy	1+1							
Fans	4 hot-swappable f	fans							
Noise	75.5 dBA at maxin	num fan speed							
Rack mountable	Yes, mount rails in	ncluded (4-post EIA-	310-D rack)						
Weight	105 lb (47.7 kg) with one security module; 135 lb (61.2 kg) fully configured								
Temperature: standard operating	Up to 10,000 ft (3000 M): 32 to 104°F (0 to 40°C) for SM-24 module 32 to 88°F (0 to 35°C) for SM-36 module at sea-level Altitude adjustment notes: For SM-36, maximum temp is 35°C, for every 1000 feet above sea level subtract 1°C								

Specification	Description
Temperature: NEBS operating	Long term: o to 45°C, up to 6,000 ft (1829 m) Long term: o to 35°C, 6,000 to 13,000 ft (1829-3964 m) Short term: -5 to 55°C, up to 6,000 ft (1829 m) Note: Cisco Firepower 9300 NEBS compliance applies only to SM-24 configurations.
Temperature: nonoperating	-40 to 149°F (-40 to 65°C); maximum altitude is 40,000 ft
Humidity: operating	5 to 95% noncondensing
Humidity: nonoperating	5 to 95% noncondensing
Altitude: operating	SM-24: o to 13,000 ft (3962 m) SM-36: o to 10,000 ft (3048 m); please see above Operating Temperature section for temperature adjustment notes
Altitude: nonoperating	40,000 ft (12,192 m)

^{*} Minimum turn-on voltage is -44V DC

 Table 7.
 Cisco Firepower 2100 Series, 4100 Series and Cisco Firepower 9300 NEBS, Regulatory, Safety, and EMC Compliance

Specification	Description
NEBS	Cisco Firepower 9300 is NEBS compliant with SM-24 Security Modules. Cisco Firepower 4120 is NEBS compliant.
Regulatory compliance	Products comply with CE markings per directives 2004/108/EC and 2006/108/EC
Safety	 UL 60950-1 CAN/CSA-C22.2 No. 60950-1 EN 60950-1 IEC 60950-1 AS/NZS 60950-1 GB4943

Cisco Trust Anchor Technologies

Cisco Trust Anchor Technologies provide a highly secure foundation for certain Cisco products. They enable hardware and software authenticity assurance for supply chain trust and strong mitigation against a man-in-the-middle compromise of software and firmware.

Trust Anchor capabilities include:

- **Image signing:** Cryptographically signed images provide assurance that the firmware, BIOS, and other software are authentic and unmodified. As the system boots, the system's software signatures are checked for integrity.
- Secure Boot: Secure Boot anchors the boot sequence chain of trust to immutable hardware, mitigating threats against a system's foundational state and the software that is to be loaded, regardless of a user's privilege level. It provides layered protection against the persistence of illicitly modified firmware.
- Trust Anchor module: A tamper-resistant, strong-cryptographic, single-chip solution provides hardware authenticity assurance to uniquely identify the product so that its origin can be confirmed to Cisco, providing assurance that the product is genuine.

Firepower DDoS Mitigation

Firepower DDoS Mitigation is provided by Radware Virtual DefensePro (vDP), available and supported directly from Cisco on the following Cisco Firepower 9300 and 4100 series appliances:

Cisco Firepower Model	ASA image	FTD Image
9300 – SM-44	yes	yes
9300 – SM-36	yes	yes
9300 – SM-24	yes	yes
4150	yes	yes
4140	yes	yes
4120	yes	yes
4110	no	yes

Radware vDP is an award-winning, real-time, behavioral DDoS attack mitigation solution that protects organizations against multiple DDoS threats. Firepower DDoS mitigation defends your application infrastructure against network and application degradation and outage.

DDoS Mitigation: Protection Set

Firepower's vDP DDoS mitigation consists of patent-protected, adaptive, behavioral-based real-time signature technology that detects and mitigates zero-day network and application DDoS attacks in real time. It eliminates the need for human intervention and does not block legitimate user traffic when under attack.

The following attacks are detected and mitigated:

- SYN flood attacks
- Network DDoS attacks, including IP floods, ICMP floods, TCP floods, UDP floods, and IGMP floods
- Application DDoS attacks, including HTTP floods and DNS query floods
- Anomalous flood attacks, such as nonstandard and malformed packet attacks

Performance

The performance figures in Table 8 apply to all Cisco Firepower 4100 series models.

Table 8. Key DDoS Performance Metrics for Cisco Firepower 4100 Series

Parameter	Value
Maximum mitigation capacity/throughput	10 Gbps
Maximum legitimate concurrent sessions	209,000 Connections Per Second (CPS)
Maximum DDoS flood attack prevention rate	1,800,000 Packets Per Second (PPS)

The performance figures in Table 9 are for Cisco Firepower 9300 with 1 to 3 Security Modules irrespective of Security Module type (SM-24, SM-36 or SM-44).

Table 9. Key DDoS Performance Metrics for Cisco Firepower 9300 with 1, 2, or 3 Security Modules.

Parameter	Firepower 9300 with 1 Security Module	Firepower 9300 with 2 Security Modules	Firepower 9300 with 3 Security Modules
Maximum mitigation capacity/throughput	10 Gbps	20 Gbps	30 Gbps
Maximum legitimate concurrent sessions	209,000 Connections Per Second (CPS)	418,000 Connections Per Second (CPS)	627,000 Connections Per Second (CPS)
Maximum DDoS flood attack prevention rate	1,800,000 Packets Per Second (PPS)	3,600,000 Packets Per Second (PPS)	5,400,000 Packets Per Second (PPS)

Ordering Information

Cisco Smart Licensing

The Cisco Firepower NGFW is sold with Cisco Smart Licensing. Cisco understands that purchasing, deploying, managing, and tracking software licenses is complex. As a result, we are introducing Cisco Smart Software Licensing, a standardized licensing platform that helps customers understand how Cisco software is used across their network, thereby reducing administrative overhead and operating expenses.

With Smart Licensing, you have a complete view of software, licenses, and devices from one portal. Licenses are easily registered and activated and can be shifted between like hardware platforms. Additional information is available here: https://www.cisco.com/web/ordering/smart-software-licensing/index.html. Related information, on Smart Licensing Smart Accounts, is available here: https://www.cisco.com/web/ordering/smart-software-manager/smart-accounts.html.

Cisco Smart Net Total Care Support: Move Quickly with Anytime Access to Cisco Expertise and Resources

Cisco Smart Net Total Care[™] is an award-winning technical support service that gives your IT staff direct anytime access to Technical Assistance Center (TAC) engineers and Cisco.com resources. You receive the fast, expert response and the dedicated accountability you require to resolve critical network issues.

Smart Net Total Care provides the following device-level support:

- Global access 24 hours a day, 365 days a year to specialized engineers in the Cisco TAC
- Anytime access to the extensive Cisco.com online knowledge base, resources, and tools
- Hardware replacement options include 2-hour, 4-hour, Next-Business-Day (NDB) advance replacement, as well as Return For Repair (RFR)
- · Ongoing operating system software updates, including both minor and major releases within your licensed feature set
- Proactive diagnostics and real-time alerts on select devices with Smart Call Home

In addition, with the optional Cisco Smart Net Total Care Onsite Service, a field engineer installs replacement parts at your location and helps ensure that your network operates optimally. For more information on Smart Net Total Care please visit: https://www.cisco.com/c/en/us/services/portfolio/product-technical-support/smart-net-total-care.html.

Select Part Numbers

Tables 10, 11, and 12 provide details on part numbers for Cisco Firepower NGFW solutions. Please consult the Ordering Guide for additional configuration options and accessories.

Table 10. Cisco Firepower 2100 Series: Select Product Components

Part Number (Appliance Master Bundle)	Description
FPR2110-BUN	Cisco Firepower 2110 Master Bundle
FPR2120-BUN	Cisco Firepower 2120 Master Bundle
FPR2130-BUN	Cisco Firepower 2130 Master Bundle
FPR2140-BUN	Cisco Firepower 2140 Master Bundle
Part Number (Network Module)	Description
FPR2K-NM-8X10G=	Spare Cisco Firepower 8-port SFP+ network module

Part Number (Appliances with FTD software)	
FPR2110-NGFW-K9	Cisco Firepower 2110 NGFW Appliance, 1RU
FPR2120-NGFW-K9	Cisco Firepower 2120 NGFW Appliance, 1RU
FPR2130-NGFW-K9	Cisco Firepower 2130 NGFW Appliance, 1RU, 1 x Network Module Bays
FPR2140-NGFW-K9	Cisco Firepower 2140 NGFW Appliance, 1RU, 1 x Network Module Bays
Cisco Firepower 2100 Series NGFW Select Licenses	
L-FPR2110T-TMC=	Cisco Firepower 2110 Threat Defense Threat, Malware, and URL License
L-FPR2120T-TMC=	Cisco Firepower 2120 Threat Defense Threat, Malware, and URL License
L-FPR2130T-TMC=	Cisco Firepower 2130 Threat Defense Threat, Malware, and URL License
L-FPR2140T-TMC=	Cisco Firepower 2140 Threat Defense Threat, Malware, and URL License
Note: These optional security services licenses can be ordered with 1-, 3-, or 5-year subscriptions.	

Part Number (Appliances with ASA Software)	
FPR2110-ASA-K9	Cisco Firepower 2110 ASA Appliance, 1RU
FPR2120-ASA-K9	Cisco Firepower 2120 ASA Appliance, 1RU
FPR2130-ASA-K9	Cisco Firepower 2130 ASA Appliance, 1RU, 1 x Network Module Bays
FPR2140-ASA-K9	Cisco Firepower 2140 ASA Appliance, 1RU, 1 x Network Module Bays
Optional ASA Software Licenses	Description
Optional ADA Software Licenses	Description
L-FPR2K-ENC-K9=	License to enable strong encryption for ASA on Cisco Firepower 2100 Series
L-FPR2K-ENC-K9=	License to enable strong encryption for ASA on Cisco Firepower 2100 Series
L-FPR2K-ENC-K9= L-FPR2K-ASASC-10=	License to enable strong encryption for ASA on Cisco Firepower 2100 Series Cisco Firepower 2100 Add-on 10 security context licenses

 Table 11.
 Cisco Firepower 4100 Series: Select Product Components

Part Number (Appliance Master Bundle)	Description
FPR4110-BUN	Cisco Firepower 4110 Master Bundle, for ASA or Cisco Firepower Threat Defense Image
FPR4120-BUN	Cisco Firepower 4120 Master Bundle, for ASA or Cisco Firepower Threat Defense Image
FPR4140-BUN	Cisco Firepower 4140 Master Bundle, for ASA or Cisco Firepower Threat Defense

	Image
FPR4150-BUN	Cisco Firepower 4150 Master Bundle, for ASA or Cisco Firepower Threat Defense Image
Part Number (Spare Network Module)	Description
FPR4K-NM-8X10G=	Spare Cisco Firepower 8-port SFP+ network module
FPR4K-NM-4X40G=	Spare Cisco Firepower 4-port QSFP+ network module
Hardware Accessories	

Please consult the ordering guide for accessories including rack mounts, spare fans, power supplies, and Solid-State Drives (SSDs)

Optional ASA Software Licenses	Description	
L-F4K-ASA-CAR	License to add Carrier Security Features to ASA	
L-FPR4K-ENCR-K9	License to enable strong encryption for ASA on Cisco Firepower 4100 Series	
L-FPR4K-ASASC-10	Cisco Firepower 4100 Add-on 10 security context licenses	
Cisco Firepower 4100 Series NGFW Select Licenses		
L-FPR4110T-TMC=	Cisco Firepower 4110 Threat Defense Threat, Malware, and URL License	
L-FPR4120T-TMC=	Cisco Firepower 4120 Threat Defense Threat, Malware, and URL License	
L-FPR4140T-TMC=	Cisco Firepower 4140 Threat Defense Threat, Malware, and URL License	
L-FPR4150T-TMC=	Cisco Firepower 4150 Threat Defense Threat, Malware, and URL License	
Note: These optional security services licenses can be ordered with 1-, 3-, or 5-year subscriptions.		

 Table 12.
 Cisco Firepower 9300: Select Product Components

Part Number (Chassis)	Description
FPR-C9300-AC	Cisco Firepower 9300 AC Chassis - includes 2 power supply units + 4 fans + rack-mount kit (3RU; accommodates up to three security modules)
FPR-C9300-DC	Cisco Firepower 9300 DC Chassis - includes 2 power supply units + 4 fans + rack-mount kit (3RU; accommodates up to three security modules)

Part Number (Chassis)	Description	
FPR-C9300-HVDC	Cisco Firepower 9300 high-voltage DC Chassis - includes 2 power supply units + 4 fans + rack-mount kit (3RU; accommodates up to three security modules)	
Part Number (Security Module)	Description	
FPR9K-SM-24	24 Physical Core Security Module (NEBS Ready)	
FPR9K-SM-36	36 Physical Core Security Module	
FPR9K-SM-44	44 Physical Core Security Module	
ASA Software Licenses for Cisco Firepower 9300	Description	
L-F9K-ASA-CAR	License to add Carrier Security Features to ASA	
L-F9K-ASA-CAR=	License to add Carrier Security Features to ASA	
L-F9K-ASA-SC-10	License to add 10 Security Contexts to ASA in Cisco Firepower 9000	
L-F9K-ASA-SC-10=	License to add 10 Security Contexts to ASA in Cisco Firepower 9000	
L-F9K-ASA	License to run Standard ASA on a Cisco Firepower 9300 module	
L-F9K-ASA=	License to run Standard ASA on a Cisco Firepower 9300 module	
L-F9K-ASA-ENCR-K9	License to enable strong encryption in ASA running on Cisco Firepower 9000	
Cisco Firepower 9300 NGFW Threat Defense Software Licenses	Description	
FPR9K-TD-BASE	Cisco Firepower Threat Defense Base License for Cisco Firepower 9300 NGFW	
L-FPR9K-SM24-TMC=	Cisco Firepower 9000 SM-24 Threat Defense Threat, Malware, and URL License	
L-FPR9K-SM24-TMC-3Y	Cisco Firepower 9000 SM-24 Threat Defense Threat, Malware, and URL 3Yr Svc	
L-FPR9K-SM36-TMC=	Cisco Firepower 9000 SM-36 Threat Defense Threat, Malware, and URL License	
L-FPR9K-SM36-TMC-3Y	Cisco Firepower 9000 SM-36 Threat Defense Threat, Malware, and URL 3Yr Svc	
L-FPR9K-SM44-TMC=	Cisco Firepower 9000 SM-44 Threat Defense Threat, Malware, and URL License	
L-FPR9K-SM44-TMC-3Y	Cisco Firepower 9000 SM-44 Threat Defense Threat, Malware, and URL 3Yr Svc	

^{*}Note: Firepower 9300 may also be deployed as a dedicated threat sensor, with fail-to-wire network modules. Please contact your Cisco representative for details.

Cisco Services

Cisco offers a wide range of service programs to accelerate customer success. These innovative services programs are delivered through a unique combination of people, processes, tools, and partners, resulting in high levels of customer satisfaction. Cisco Services help you protect your network investment, optimize network operations, and prepare your network for new applications to extend network intelligence and the power of your business. For more information about Cisco services for security, visit https://www.cisco.com/go/services/security.

Cisco Capital

Flexible payment solutions to help you achieve your objectives

Cisco Capital makes it easier to get the right technology to achieve your objectives, enable business transformation and help you stay competitive. We can help you reduce the total cost of ownership, conserve capital, and accelerate growth. In more than 100 countries, our flexible payment solutions can help you acquire hardware, software, services and complementary third-party equipment in easy, predictable payments. <u>Learn more</u>.
